Polysaccharide Storage Myopathy Type 1 (PSSM1) <b>N/PSSM1</b>	Affected - horse has one copy of the PSSM1 gene

**Additional Information**

If testing for a disease or a disorder was performed and results indicate the animal is affected or at risk, we recommend contacting your veterinarian for further clinical evaluation and for additional information on disease and management.

For more detailed information on Equine Disease Panel test results, please visit our website at:  
[www.vgl.ucdavis.edu/services/horse/qhpanel.php](http://www.vgl.ucdavis.edu/services/horse/qhpanel.php)

**License Information**

GBED testing performed under a license agreement with the University of Minnesota.  
 HERDA testing performed under a license agreement with the University of California, Davis.  
 PSSM1 testing performed under a license agreement with the American Quarter Horse Association.

Results are determined using PCR-based methods. The results relate only to the sample tested as identified by the submitter (for example, identity and/or breed).

**Report authorized by Dr. Rebecca Bellone, VGL Director**
